

# MINUTES AND PROCEEDINGS OF A REGULAR MEETING OF THE BUTLER COUNTY BOARD OF SUPERVISORS HELD ON MAY 14, 2013.

Meeting called to order at 9:00 a.m. by Chairman Mark V. Reiher with members Tom Heidenwirth and Rex Ackerman present. Also present were Office Manager Rosie Trees, Chad Campbell of Campbell-Mellema Insurance, Engineer John Riherd and Fern Myers, Allison, Iowa.

Minutes of the previous meeting were read and approved as read.

Board met with Chad Campbell of Campbell-Mellema Insurance to discuss completed Workman's Compensation and Deductible Studies. No action taken.

Public Hearing was held on Wind Energy Systems Ordinance Title VI No. 11, Amendment to Zoning Ordinance Title VI No. 7. Present were Engineer John Riherd, Zoning Administrator Mitch Nordmeyer and Fern Myers, Allison, Iowa. It was reported that no written or oral comments were received. At the close of the Public Hearing it was moved by Ackerman, second by Heidenwirth to adopt said Ordinance as follows:

## BUTLER COUNTY WIND ENERGY SYSTEMS TITLE VI NO. 11

An Ordinance amending Zoning Ordinance Title VI No. 7 to establish Wind Energy Systems Regulations for Butler County, Iowa.

The Board of Supervisors of Butler County, Iowa ordains:

### A. Small Wind Energy Systems

The purpose of this regulation is to promote the safe, effective, and efficient use of small wind energy systems installed to reduce the on-site consumption of utility-supplied electricity. This ordinance is in compliance with HF810, enacted in 2009, creating the Small Wind Innovation Zone program. Butler County finds that wind energy is an abundant, renewable, and non-polluting energy resource and that its conversion to electricity will reduce our dependence on non-renewable energy resources and decrease the air and water pollution that results from the use of non-renewable energy sources.

Distributed small wind energy systems will help diversify the state's energy portfolio. Small wind energy systems also make the electricity supply market more competitive by promoting customer choice. The State of Iowa has enacted a number of laws and programs to encourage the use of small-scale renewable energy systems, including net metering, sales tax exemptions, property tax exemptions, production tax credits, and the Small Wind Innovation Zone program.

Small wind energy systems shall be a permitted use in all zoning classifications provided a conditional use is issued in conformance with and subject to certain requirements as set forth below. Butler County shall require the installer of the small wind energy system, or the owner of the property upon which the system will be installed, to obtain a building permit for the system.

#### 1. Tower Height and setback

The base of the small wind energy system tower shall be set back from all property lines, public right of ways, and above-ground public utility lines at a distance of not less than 115% of the total extended height of the tower. Towers shall be allowed closer to a property line than its total extended height if the abutting property owner(s) grants written permission, provided that the tower installation complies with the other applicable setbacks herein provided. As long as the total extended height meets the setback requirements, there shall be no specific height limitation, except as imposed by the Federal Aviation Administration regulations as stated in Section XX (C) of Butler County Ordinance VI No. 7.

#### 2. Requirements for engineered drawings/approval and soil studies

A small wind energy system of greater than 20 kw, or a small wind energy system mounted on a structure other than a free-standing tower, shall not be erected in Butler County, unless the plans and specifications for the system have received the stamped approval of an Iowa registered engineer. In lieu of obtaining the stamped approval of an Iowa registered engineer for each small wind energy system of 20 kw or less mounted on a free-standing tower, including its soils study and foundations plans for such system, for a one-time review and stamped approval by an Iowa registered engineer as suitable for construction in any soil condition that exists in the State of Iowa. If such one-time stamped approval is obtained, that manufacturer may thereafter construct small wind energy systems of 20 kw or less in Butler County, utilizing the approved soils study and foundation plans for the 20 kw small wind energy system, without obtaining and presenting the stamped approval of an Iowa registered engineer for each such installation.

#### 3. Compliance with Federal Aviation Administration Regulations (FAA)

No small wind energy system shall be constructed, altered, or maintained so as to project above any of the imaginary airspace surfaces described in FAR Part 77 of the FAA guidance on airspace protection.

#### 4. Safety

Any climbing foot pegs or rungs below 12 feet of a free-standing tower shall be removed to prevent unauthorized climbing. For lattice or guyed towers, sheets of metal or wood may be fastened to the bottom tower section such that it cannot readily be climbed.

**5. Sound**

Sound produced by the small wind energy system under normal operating conditions, as measured at the property line, shall: a) not produce sound at a level that would constitute a nuisance; b) shall comply with any local ordinance regulating the volume of sound as a nuisance, if applicable. Sound levels, however, may be exceeded during short-term events out of anyone's control, such as utility outages and/or severe wind storms.

**6. Compliance with National Electric Code**

Building permit applications for small wind energy systems shall be accompanied by a line drawing of the electrical components, as supplied by the manufacturer, in sufficient detail to allow for a determination that the design and manner of installation conforms to the state National Electric Code.

**7. Utility Notification**

No small wind energy system shall be installed until evidence has been given that the utility company has authorized interconnection of the small wind energy system to its electrical distribution or transmission, under an agreement offered by the utility. Properties not connected to the public utility system shall be exempt from this requirement.

**8. Insurance**

A person seeking a building permit to erect a small wind energy system shall provide evidence, in the form of a certificate of insurance satisfactory to Butler County, showing general liability insurance coverage for the installation and operation of the system under a standard homeowner's or standard business owner's policy, separate and distinct from any insurance requirements of a public utility.

**9. Abandonment**

If a wind turbine is inoperable for six consecutive months, the owner shall be notified that they must, within six months of receiving the notice, restore the small wind energy system to operating condition. If the owner fails to restore the system to operating condition within the six month time frame, it shall be considered abandoned and the owner shall be required, at the owner's expense, to remove the small wind energy system. A small wind energy system that has been abandoned may be abated as a public nuisance.

**10. Signage**

No signs, other than appropriate warning signs, or standard manufacturer's or installer's identification signage, shall be displayed on a wind generator, tower, building, or other structure associated with a small wind energy system, subject to local sign regulation if any.

**11. Lighting**

No illumination of the turbine or tower shall be allowed unless required by the FAA.

**B. Large Wind Energy Systems**

The purpose of this regulation is to promote the safe, effective, and efficient use of large wind energy systems, Butler County finds that wind energy is an abundant, renewable, and non-polluting energy resource and that its conversion to electricity will reduce our dependence on non-renewable energy resources and decrease the air and water pollution that results from the use of non-renewable energy sources.

Large wind energy systems will help diversify the state's energy portfolio. Large wind energy systems also make the electricity supply market more competitive by promoting customer choice. Large wind energy systems shall be a permitted use in an Agriculture zoning classification provided a conditional use permit is issued in conformance with and subject to certain requirements as set forth below. Butler County shall require the installer of the large wind energy system, or the owner of the property upon which the system will be installed, to obtain a building permit for the system.

**1. Tower Height and setback**

The base of the large wind energy system tower shall be set back from all property lines, public right of ways, and above-ground public utility lines at a distance of not less than 115% of the total extended height of the tower. Towers shall be allowed closer to a property line than its total extended height if the abutting property owner(s) grants written permission, provided that the tower installation complies with the other applicable setbacks herein provided. As long as the total extended height meets the setback requirements, there shall be no specific height limitation, except as imposed by the Federal Aviation Administration regulations as stated in Section XX (C) of Butler County Ordinance VI No.7.

**2. Requirements for engineered drawings/approval and soil studies**

For all large wind energy systems, the manufacturer's engineer or another qualified engineer shall certify that the turbine, foundation and tower design of the large wind energy system is within accepted professional standards, given local soil and climate conditions.

**3. Compliance with Federal Aviation Administration Regulations (FAA)**

No large wind energy system shall be constructed, altered, or maintained so as to project above any of the imaginary airspace surfaces described in FAR Part 77 of the FAA guidance on airspace protection.

**4. Safety**

Any climbing foot pegs or rungs below 12 feet of a free-standing tower shall be removed to prevent unauthorized climbing. For lattice or guyed towers, sheets of metal or wood may be fastened to the bottom tower section such that it cannot readily be climbed.

5. Sound

Sound produced by the large wind energy system under normal operating conditions, as measured at the property line, shall: a) not produce sound at a level that would constitute a nuisance; b) shall comply with any local ordinance regulating the volume of sound as a nuisance, if applicable. Sound levels, however, may be exceeded during short-term events out of anyone’s control, such as utility outages and/or severe wind storms.

6. Compliance with National Electric Code

Building permit applications for large wind energy systems shall be accompanied by a line drawing of the electrical components, as supplied by the manufacturer, in sufficient detail to allow for a determination that the design and manner of installation conforms to the state National Electric Code.

7. Insurance

A person or company seeking a building permit to erect a large wind energy system shall provide evidence, in the form of a certificate of insurance satisfactory to Butler County, showing general liability insurance coverage for the installation and operation of the system under a standard homeowner’s or standard business owner’s policy, separate and distinct from any insurance requirements of a public utility.

8. Abandonment

If a wind turbine is inoperable for six consecutive months, the owner shall be notified that they must, within six months of receiving the notice, restore the large wind energy system to operating condition. If the owner fails to restore the system to operating condition within the six month time frame, it shall be considered abandoned and the owner shall be required, at the owner’s expense, to remove the large wind energy system. A large wind energy system that has been abandoned may be abated as a public nuisance.

9. Signage

No signs, other than appropriate warning signs, or standard manufacturer’s or installer’s identification signage, shall be displayed on a wind generator, tower, building, or other structure associated with a large wind energy system, subject to local sign regulation if any.

10. Lighting

No illumination of the turbine or tower shall be allowed unless required by the FAA.

Upon Roll Call the vote thereon is as follows:

AYES: Tom Heidenwirth      NAYS: None  
Rex Ackerman  
Mark V. Reiher

Approved and adopted this 14<sup>th</sup> day of May, 2013.

ATTEST: Lizbeth Williams, County Auditor

It was further moved by Ackerman, second by Heidenwirth to waive the 2<sup>nd</sup> and 3<sup>rd</sup> readings of said Ordinance.

Board considered revised 28E Agreement to join County Social Services. Moved by Heidenwirth, second by Reiher to approve said Agreement. Motion carried.

Board met with Veterans Affairs Director Steve Ulrichs to discuss downsizing the Commissioners from five members to three. No action taken.

Board approved claims as submitted.

Butler County Claims paid from April 1, 2013 through April 30, 2013.
